Assignment Title:

Exploring Contemporary Ethical Issues in Information Technology at Work and in Society

Assignment Objective:

To explore, analyse, and evaluate current ethical issues arising from the use of information technology in professional and social settings, and to propose appropriate responses or guidelines.

Assignment Task:

You are required to write a report (2,000–2,500 words) investigating **two or more** current ethical issues related to information technology, with one issue from the **workplace context** and another from a **social context**.

Your report must include:

A. Workplace Ethical Issue (e.g., choose one)

- Employee monitoring systems
- Workplace automation and job elimination
- Data privacy in enterprise systems
- Whistleblowing in tech firms

For the chosen issue:

- Explain the ethical concern and its relevance to IT
 - Analyse real-life incidents or case studies
 - Discuss the implications for employees and employers
 - Suggest ethical guidelines or best practices
-

B. Social Ethical Issue (e.g., choose one)

- Misinformation on social media
- AI surveillance and facial recognition in public spaces
- Cyberbullying or online harassment
- Personal data privacy on social platforms

For the chosen issue:

- Explain the ethical dilemma and its societal impact
 - Analyse current trends, technologies, and stakeholder perspectives
 - Reference actual cases or news events
 - Propose strategies or frameworks to manage the issue ethically
-

 Additional Requirements:

- Introduction and conclusion clearly framing the issues
 - Use of ethical theories or principles (e.g., utilitarianism, rights-based ethics, professional codes)
 - IEEE-style citations with a **minimum of 5 academic or credible sources**
 - Professional report format (with headings, subheadings, and optional visuals)
-
