(b) State the punishments for Phishing and for the breach of PDPA. (8 marks)

(c) Describe **FOUR (4)** types of Hackers. (8 marks)

[Total: 25 marks]

Q3. The following article appeared in the Channel News Asia on 12th June 2024.

"A growing number of Universities in China have issued rules on the use of Artificial Intelligence (AI) in students work as the college graduation season gets into full swing.

The move comes amid institutions concerns over academic integrity and as a recent survey points to the widespread use of AI tool among college students."

UCCD3053 INFORMATION TECHNOLOGY PROFESSIONAL ETHICS**Q3. (Continued)**

Fuzhou University in April announced that all undergraduate thesis for students graduating this year will be subject to checks for AI generated contents before the final draft and after the paper are reviewed. The decision to roll out the trial system is to further strengthen academic ethics and academic integrity education.

Hubei University has also announced similar measures. If it is found that the paper exceeds 40% AI generated content, lecturers should tell the students to make revisions. Polls suggested that the usage of AI tools among students is common among students. A November 2023 survey by state youth newspaper China Youth Daily showed that nearly 85% of the 7,000 respondents have used AI tools."

In August 2024, a draft law on academic degrees was submitted that included a ban on using AI to write dissertations. Under it, an academic degree will be withheld/revoked if the recipient's dissertations involved academic misconduct such as plagiarism, ghostwriting or falsification.

The Law will take effect from 1st January 2025, according to the state news Agency Xinhua."
